

Setup Guide

MazeHunt Setup Guide

Commands

- To begin the arena setup process, you must execute the command `/mha setup [arenaName]` without `[]` and where `arenaName` is the name of your arena

Area Selection

- Using the selection tool defined in the config file (default is the golden shovel), you will be prompted to do an area selection of the arena by selecting the two corner points of the arena

Sword Location

- You will then be prompted to click anywhere to set your current location as the sword location.
- This step is important!* Stand exactly where you want the sword award location to be. This is the location players will have to walk over in order to get the sword.

Starting Points

- You will then be promoted to click anywhere to set your current location (four different times) as the four starting points for your arena.

Complete

- After all of the necessary selections have been made, you will receive a message informing you that the arena has been successfully setup. You can now play in this arena

Join Signs

- MazeHunt incorporates a sign join feature to enable players to view sings with the arena information as well as click to join.
- You can create a MazeHunt sign by placing a sign and adding text as shown in the format below: MazeHunt Arena Sign Format
